Whist Drive Winners.

Those who attended the whist drive and dance at the Moose hall on Friday spent a very enjoyable evening. Those who won at cards are: Gents, D E Moyer 1, L. Wudel 2, M Bilinsky 3
Ladies, Miss Mary Campbell 1, Mrs Kelly 2, Miss Anna L Miller.

The Rifle Club's Dance.

The officers and members of the Stony Plain rifle club intend putting on a dance in Moose hall on the evening of Monday next, the 22d. During the intermission the prizes won at the season's contests will be awarded the winners. Barth's orchestra has been engaged.

Bell--McKinlay.

Mr and Mrs D McKinlay, Namayo, announce the marriage of their daughter Mary Alice to Mr Ralph Anderson Bell, son of Mrs M. M Bell of Namayo and the late Robert Bell. The wedding took place at the home of the Rev. A Stewart, 84th av. Edmonton, on Saturday January 6th. The bride was formerly a resident of the Comet district, and is well known here, having attended the S. P. High.

Letendyre--Loyer.

A very pretty wedding took place on Monday last, Jan. 15th, at St. Joseph's R C. Church, at Wabamun, when Doris Loyer, daughter of Mr and Mrs Victor Loyer, Wabamun, became the bride of Mr Frederick Letendyre, son of Mr and Mrs Letendyre, of Lac Ste Anne.

The wedding ceremony was performed by the pastor, Rev Chas Keenar, in the presence of a number of the friends of both the contracting parties. The young couple have taken up their residence in Wabamun.

The Curling Club's Banquet.

Members of the Stony Plain curling club held their annual banquet on Thursday evening last. This was the culmination of the contest between the rinks on the president's side and the rinks headed by the vice-president, which had been in progress since the beginning of the season. The president's bunch were the losers and footed the bill for the eatable. The toastmaster was Pres. Geo Opporshanger, and the usual toasts were given. Those who responded to the toasts were Vice Pres. James Malloch, R. M. Oatway, F W Yents, J W McCull, W E H Lewis, W J Connolly.

All the skips of both sides were present, and practically all the members, and a few visitors.

Spruce Grove rink was in attendance, consisting of Skip Connolly, R Sherwin, C McKinlay, Jac Schoep.

Miss Host Larson of the Royal Cafe was the caterer, and excelled himself on this occasion.

Mature Age and Efficiency

An Eastern professor recently informed a gathering of Eastern educationists that no person over 40 years of age should be permitted to teach school. This recalls that other dictum of that famous doctor who said that every person over 65 should be quietly chloroformed. Both statements fail to convince because they are so palpably overstatements.

It is true, of course, that youth is becoming more insistent for recognition in the world of affairs, mainly because the problems of the times appear to call for that courage, initiative and energy which are compact of youth. The war robbed one generation of its birthright and opportunities. The depression appears to this generation to have repeated the process. That youth should be insistent against conditions which they did nothing to bring about, is natural in the circumstances, and, possibly, salutary in the result. The Communist movement in Russia was energized by the youth of Russia; Mussolini recruited his Fascist army from the ranks of youth. Hitler has enrolled German youth under the Nazi banner. These are manifestations of youth's protest against conditions which they believe, to youth's fulfillment.

The trouble is to set a hard and fast line where youth ends and age begins. If that were possible, it would be possible more accurately to estimate the significance of the two statements and their many imputations and implications. But there is no such line. It is possible to cite instances innumerable of men beyond forty who have proved great teachers of the young, and men who have made their finest contributions to civilization after passing sixty-five. Had the 20th century been able to select at 40, British education would have been that much poorer. Had Edison acknowledged his faculties exhausted at that age, much of his work for the advancement of science and enhancement of living, would have been left undone. Had forty seen the vitality of Einstein's mental powers reach its zenith, there would not have been that competition among the great institutions of learning for his services which followed his expulsion from Germany. It was after he had passed the age of forty, that Henry Ford had his great idea and launched the enterprise, coupled with his name. The tally of similar examples can be carried ad infinitum.

In the political field, President Roosevelt, far beyond the assigned "deadline" of forty, has tackled the vast problems of his country with the courage, vigor and zest which qualify him for a place with youth in these characteristics. Ramsay MacDonald, with equal energy and resource, did not hesitate, when the needs of his country called for drastic action, to scrap the ideals of a lifetime for those of more practical efficacy in the crisis of the hour. The youth of Russia, Germany and Italy accepted leadership of men beyond the "allotted span," because these men oriented the chaos of ideas torturing the youthful minds. Youth, apparently, construed in terms of abstract qualities, cannot be measured by age, which suggests the well-known saying, "A man is as old as he feels."

There must be some reason for a prominent educationist to make so startling a statement as a gathering of educationists, however. It is impossible to believe that, with such an audience, he spoke in jest, in an idle moment or without proper forethought. Perhaps his inspiration may be found in the work of the Spanish philosopher, Ortega Gasset, who, in "The Modern Theme," has suggested that each generation is distinct in itself in that it differs in its reactions to ideas and environment from the generations preceding it. If this thesis be admitted, it would follow, of course, that one generation's viewpoint, being radically different from that of the one succeeding it, the former is out of touch with the youth of its own day and therefore not qualified to be its mentor. The more remote the generation from that of school age, the more out of touch it would be with the student's ideas and ideals.

Whatever the difference, custom has decreed that the one should be vested with the tutelage of the other. It is difficult to see how it could be otherwise. While there are no doubt many instances in which the generation from which the teacher be drawn should not be too remote from that furnishing the school population of today, it must not be forgotten that the knowledge gleaned from experience of life and living acquired by the older generation must be of inestimable value in preparing the young for their responsibilities.

After all, no new social structure is created with each new generation. They may improve, or remodel, and the social structure characteristic of western civilization is the cumulative result of such improvements. Something constant is imparted from generation to generation however. So long as this condition exists, the accumulated experience of the past must retain its value and, finding expression through the process of education, in school or in the home, be passed on to those preparing themselves for the duties and responsibilities of full citizenship.

Youth demands recognition and should be recognized. But an intelligent definition of youth, and the time of more time, is necessary to the complete acceptance of the statement that no person over forty should be entrusted with the task of teaching youth.

Science gradually is extending the period described by life insurance companies as "life expectancy." Why bother, if chloroform is the best potion when one has reached sixty-five?

A wheel in the great clock of the former royal palace at Potsdam, Germany, revolves only once in a period of 400 years. There's a clock to hold a clock-watcher.

Canada exported 4,062,000 pounds of beef to Great Britain up to October 30 this year, an increase of 3,063,000 pounds over the corresponding ten months of last year.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far; if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Hold Strange Congress

Romanians Of World Plan Establishment Of Stable Community

"Gripes of the world unite!" is the motto of the General Association of Romanians which held a strange congress in Bucharest.

The wave of fanatic nationalism which is sweeping these parts of Europe has also affected the nomads who want to give up their free and easy life and organize themselves into a race-conscious and stable community. Thus the last citadel of romanticism and liberalism in its absolute sense is about to be ruined. It will be replaced, in all probability by political demagoguery.

Hundreds of Romanians in picturesque dress came to the congress, flocking in from all corners of the country. The meeting took place in the open air, in the gipsy quarter of Bucharest which consists of innumerable mud huts built around a pestilential lake on the outskirts of the city. A regiment of gendarmes took care that the participants behaved themselves.

The congress was held in perfect order. The gipsies seemed convinced that they were entering upon a new era of "national dignity," as was announced by their leader, George A. Lazarus, an exceptionally good impersonator of Hitler both as regards aspect and oratory. Following are some of his most galvanizing phrases: "We are a great and noble race. We don't want to be ridiculed and treated as the dregs of society. Let us form a strong nucleus in Roumania, and all the Romanians of the world will be inspired by us and become proud of their race."

WORKED ONLY ONE WEEK IN TWO

Sciatica Kept Him At Home

It is the wife who sends us this information about a husband's troubles. She writes:—"For some time past, my husband has been able to work only one week in two, on account of sciatica. He suffers so much from it that he could scarcely move for the pain. We tried many things but without result. Then we saw in the papers an account of the good results that had been obtained from Kruschen Salts, and we decided to give them a trial. For twelve months past, my husband has been taking his 'little dose' of Kruschen every morning. Now, he has no more trouble with the sciatica, and is working regularly." (Mrs. M.)

Doctors estimate that one-half of civilized humanity suffers from partial constipation. This condition results in an accumulation of residue of waste matter, which poisons the blood and produces sciatica, as well as many of the mystery aches and pains from which people suffer. Kruschen keeps the organs of elimination in perfect trim, so that every particle of waste matter is given them a trial. Then we saw in the papers an account of the good results that had been obtained from Kruschen Salts, and we decided to give them a trial. For twelve months past, my husband has been taking his 'little dose' of Kruschen every morning. Now, he has no more trouble with the sciatica, and is working regularly." (Mrs. M.)

Expect Increase In Live Cattle Shipments

Canadian Officials Anticipate Better Market In United Kingdom

Officials of the agricultural department look forward to a good year in the export trade of live cattle from Canada to the United Kingdom, despite the quota which will limit shipments for the first three months. The limit is slightly under 8,000 head, equal to what was shipped last year during the same three months.

The United Kingdom had a shortage of root crops last season. The result was that many cattle raisers without sufficient fodder sold their cattle for slaughter when only partially finished. The shortage of feed in Canada also caused many unfinished cattle in this country to be shipped to Great Britain. The result had a depressing effect on the market which was injurious to both British and Canadian cattle raisers.

Rule For Egg Shipments

No Canadian eggs are allowed to be exported out of Canada unless they are packed in Canadian Standard cases—each case contains 30 dozen eggs—in new wire export filters and flats, and with new kiln dried, paper-covered, excelsior pads at top and bottom, or with any other pad, flat, or cushion approved by the Dominion Minister of Agriculture.

How to Stop a Cold Quick as You Caught It

Take 2 Aspirin Tablets.

Drink full glass of water. Repeat treatment in 2 hours.

If throat is sore, crush and dissolve 3 Aspirin Tablets in a half glass of water and gargle according to directions in box.

Almost Instant Relief in This Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICK-EST, safest, surest way to treat a cold. For it will check an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets, Aspirin

Does Not Harm the Heart

is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet. They dissolve almost instantly. And thus work almost instantly when you take them. And for a gargle, Aspirin Tablets dissolve so completely, they leave no irritating particles. Get a box of 12 tablets or bottle of 24 or 100 at any drugstore.

ASPIRIN TABLETS ARE MADE IN CANADA

Egg-Grading Regulations

New Schedule Came Into Effect The First Of January

The riddle of why does a chicken cross the road is not a whit more baffling to a great many people than the new federal egg-grading regulations which came into force on January 1. To those who take time out to study the act, however, it presents few difficulties. The terms "fresh specials," "fresh extras" and "fresh firsts" are to be discontinued. In future fresh eggs will be designated as "A" large, "A" medium, and "A" pullets. Eggs of more than 22 ounces to the dozen will be in the large category; the medium grade will weigh between 18 and 22 ounces, and pullets' eggs will weigh up to 18 ounces. The regulations put storage eggs in "B" grade, but patrons of Central market need not be concerned about that section of the act, because a city-by-law prohibits the vending of storage eggs on the public square. Alfred Smees, manager of Central market, drew attention to the fact that interior quality was a main factor in the new grading schedule. There will be none to dispute that, except for throwing, a fresh little egg is much to be preferred to a big bad one. Superficial inspection of the exterior isn't helpful to egg shoppers, either. The customer must rely on the honesty of the purveyor, and the government, in its wisdom, gives egg dealers an special incentive to be honest by providing stiff penalties for those who are not. For the purpose of the act, a fresh egg is one in which the air cell space does not exceed one-quarter of an inch. There is a continuous process of contraction within the shell and when candling reveals an egg to have more than this amount of air cell space, it is taken as prima facie evidence that the product is making ready to grow a beard.

Egg dealers with an established clientele will not be annoyed about the new regulations. They cannot afford to sell eggs of inferior grade and, for the protection of their business, would be careful to keep quality up even in the absence of official regulations. Hamilton, Ont., Spectator.

Basal Of Egg Weight

The attention of egg shippers and egg packers is called by the Dominion Department of Agriculture to the fact that in the revised standard egg grades, individual eggs serve as the basis of weight rather than dozen or case lots. In the instance of Grade "A" large, for example, each individual egg in the pack is required to weigh two ounces and over. Similarly in the medium pack each individual egg should weigh at the rate of 22 ounces and under 24 to the dozen.

Time heals all wounds. But our time on earth is limited. That's the trouble.

Little Investors Save Billions

National Savings Movement In England Has Proved Success

British thrift is increasingly becoming a national virtue, as indicated by figures given by Walter Runciman, president of the London Board of Trade, in connection with the national savings movement.

"The total wealth of small investors in various types of investment at a conservative estimate," he said, "reaches the stupendous figure of \$2,835,250,000 (approximately \$14,162,250,000). What with this national savings movement and all that pertains to it, there is very little doubt that we need have no fear as to a country being swept away on a wave of Bolshevism."

Lord Mottistone, chairman of the movement, stated that the increase in the amount standing to the credit of depositors in the post office and trustee savings banks and to investors in national savings certificates and in government stocks purchased through the savings banks during the last three years, in spite of the financial crisis, was more than 3½ times the increase during the previous three years.

Just About Equal

The Rocky Mountains and the maritimes are just about equal in the mind of Airman Humphrey Madden. Forced to a low altitude by rain, sleet, strong headwinds and ice forming on the wings while flying from New Glasgow to Halifax, early in January, Pilot Madden said it was the toughest flight in his experience—nearly corresponding to a hazardous crossing of the Rocky Mountains he had once made.

Experiments Being Carried Out By United States Railways With Aerodynamic Trains

The experiments being conducted by United States railways with aerodynamic types of trains which will flash over the rails between New York and Los Angeles in 50 hours at an average speed of 85 miles an hour are being carefully watched by Canadian railway officials.

While opinions as to the feasibility of the new trains operating in Canada are divided, Canadian motive engineers are eagerly awaiting the results of the experiments although they point out that any development in this direction will have to wait for better times.

From the Canadian viewpoint a serious problem is presented in the all-metal construction of the trains which motive men say will likely prove to be a conductor of the bitter Canadian cold. Frost works its way through steel structures and unless backed by heavy insulation the all-steel cars would be impractical in Canada where steel, heavy insulation and wood are utilized in the making of railway coaches.

Engineers viewing the experiments in a favorable light point out the new type of trains will permit lower operating costs in addition to increased speed, comfort and luxury.

On the other hand some motive men take the view the large increase in speed will mean a decrease in safety. At present some Canadian trains average between 50 and 55 miles an hour and it is probable they have to travel at 80 miles an hour on occasions. The new trains to maintain an average of 85 miles an hour would have to touch 110 miles per hour or more—a heavy burden on the present type of road-bed which is expected to be used.

The roadbed is one of the contentious points of the contrasting points of view. Opponents say the present roadbed would not be able to stand the strain of the high-speed and a special rigid type would be needed—the cost of replacement being tremendous.

To give weight to their argument they cite the case of the "Flying Hamburger" which developed a speed of 100 miles an hour in Germany. The company which introduced the stream-line car is now completing a special track.

High costs in initial building of the trains through the use of duralumin and stainless steel in addition to the holding up of other trains to permit the "comet" train to clear track are other reasons against the new trains. Low operating costs, possible future reduction in maintenance and passenger appeal might possibly offset these facts.

However, some of the engineers are of the opinion that if special roadbeds were constructed and sufficient safety achieved, there was no reason why the experiments should not be successful.

In any event they declare if the public desires the new types of trains, the near future will see them speeding across continents in two days and two nights.

Good Sugar Beet Yield

Satisfactory Crop Grown On Northern Alberta Irrigated Land

Lethbridge Northern Irrigation District leads all other Southern Alberta districts in 1933 sugar beet yields. Indications are that this district will show an average yield of better than 11 tons per acre. Turin so far stands at the top with almost 12 tons, while Iron Springs is second with 11.33 tons. These tonages are far ahead of the Taber-Barwell district which, up to this year, has always held the high yield record.

A Valuable Manuscript

Francis Scott Key's original manuscript of "The Star Spangled Banner" was sold at public auction recently for \$24,000. The buyer was Dr. A. S. W. Rosenbach, noted bibliophile. The manuscript is a one-sheet of ordinary notepaper, the ink brown with age.

W. N. U. 2029

One Of Strangest Lakes

Possible To Walk On Body Of Fish

In Trinidad
Lake La Brea, in Trinidad, is one of the strangest lakes in the world. In legend there are lakes with no basin, sacred lakes into which rivers flow without mixing waters, and lakes that vanish in a night and reappear as quickly, but Lake La Brea is remarkable in that it is possible to walk upon it.

It is a lake of pitch occupying the crater of an old volcano. Vast quantities of bitumen are exported every year for use in road-making, yet the lake shows no signs of drying up. Fresh deposits are continually forming on the bed of the lake at a depth of about 130 feet.

It is considered to be one of the hottest places in the world, yet the bitumen forming the lake is sufficiently hard to allow of driving a horse and cart across it.

The lake has an area of some hundred acres, and is estimated to contain more than nine million tons of bitumen.

Seed Wheat For Russia

Sixteen Thousand Bushels Of Grain
Wheat Goes To Siberia

Sixteen thousand bushels of seed wheat, chiefly Garnet, will leave Saskatchewan for Siberia, bought by the Soviet government for the districts needing an early wheat, according to information received from Neil Stewart, president of the Saskatchewan Registered Seed Growers' Association. Farmers selling the seed have received a satisfactory premium over commercial prices.

Mr. Stewart said the association could have handled a larger order had field inspected seed been available.

Grain which is now stored in the Registered Seed elevator at Moose Jaw has been cleaned there and will go for February delivery at New York.

Some of the wheat was grown in Alberta.

Retaining Winter Moisture

Wheat Yield On Such Land Shows
Big Increase

The Dominion Experimental Station at Swift Current has been experimenting with yields of wheat on land where winter moisture has been prevented from running off, and has found an increase of 42 per cent. in some cases where the water was retained, compared with similarly treated land lying the same, and in the same state of cultivation, where the water was allowed to run off.

A common pigweed plant may yield as many as 117,000 seeds.

Scheme For Furtherance Of World Peace Is Advanced By A Toronto Resident

Proving Huge Success

Speaking Clock In Paris Brings In Huge Results

The recently installed "speaking clock" of the Paris telephone system is proving a huge success, the Ministry of Posts has announced. Every day it tells the time to an average of eleven thousand inquirers, incidentally bringing in a revenue of four million francs yearly, half of which goes to the State.

This robot clock can tell the time to thirty persons simultaneously. On Sundays and holidays the average drops to 6,000 an hour. The peak hour is around 8 in the morning, when hundreds of workers call for the exact time.

The mechanism of this clock is highly complicated, though for the subscriber it is a simple operation of dialling "Odeon 84-00," states the New York Times Correspondent. Three strips of film, equipped with sound tracks, one each for the hour, minute and second, are used. The strips are wound about a drum, which is driven by an electric motor controlled by a pendulum clock. A light, falling on the paper-wound drum, is reflected to a photoelectric cell which converts the varying bright and dark lines into electric impulses. The cell is connected with amplifiers and three loudspeakers, one of which announces the hour, another the minute and the third the second, always in the proper order.

When no one is calling the clock does not "talk." Everything is turned off until a telephone call comes, when the mechanism starts instantly to work.

Bricks In Color

Multi-Colored Rough Texture Bricks
Coming Into Use

Recent developments tend towards the use of multi-colored rough texture bricks, with coloring that is more pleasing to the eye and gives the appearance of charming designs without the newness that was so obvious in the old methods of construction. Such colors as Autumn Tints, Cherry Red, Brindled, Dark Strawberry, Orange, Silver Grey and Golden Grey, will be found among the new bricks. The same applies to tiles, where at least ten different colors are now available.

A reputed shortage in oak trees may be the result of their use for the manufacture of antique furniture.

A scheme for the furtherance of world peace has been advanced by a Toronto author, W. K. Dyer. The proposal, still in the early stages, is to develop a flag with the word "peace" emblazoned in deep blue letters on a white oval, representing the universe, and placed on a sky blue background. The finished product would be known as the "World Peace Flag."

It is intended by the author to have the word translated into various languages and send prints to their respective countries. Already the word has been placed on ten different prints, English covering the British Empire and the United States, German, Russian, Greek, French, Italian, Chinese, Hebrew and Esperanto, the international language.

When the proposal has become concrete, it is intended by the designer to have the peace flag submitted to the League of Nations for official recognition, and it has been stated the League of Nations society in Canada is willing to take the word "peace" when it is placed in their hands for discussion before submission to Geneva.

However Mr. Dyer does not believe his scheme has advanced to the stage for such action, and is endeavouring to have the world peace flag in as many languages as possible before taking a step in that direction.

The finale of the scheme, after it has gained recognition, is to place the flags in the school rooms of the world so the meaning of "peace" may be impressed into the minds of future generations. Accompanying the flag is a five verse song, termed "The Children's Song of Peace."

When the scheme would gain maturity, Mr. Dyer has not stated. But he believes the next few months would see the proposal advanced much further.

Appeals To King George

Private Wanted Help To Get Out Of Army

Private Sam Lee, of the 2nd Battalion of the Northamptonshire Regiment was troubled. The army did not agree with him and he was anxious to get out of it; but he did not know what steps to take. He did not relish the obvious method of approaching his commanding officer.

Then a bright idea dawned on him. He would write to the King, asking him to grant his discharge on what the army calls compassionate grounds. He spent a considerable time composing the letter. He consulted a book on etiquette and finally mailed his petition. For several days he waited hopefully; then one morning the C.O. sent for him.

It wasn't long till Private Sam Lee was on the high seas, but he no longer belonged to the 2nd Battalion of the Northamptonshire Regiment. He was on his way to join the 1st Battalion in India.

His letter to the King reached its destination, but His Majesty necessarily had to refer it to Private Lee's C.O. and the C.O. after politely but firmly pointing out that privates are not allowed to write to the King, gave him some good advice, which, on reflection, he thankfully accepted.

Language Of The Bees

Insects Employ Kind Of Dumb And Dumb Alphabet

Bees have a language of their own, according to Mrs. L. Illingworth of Hertfordshire, England. She told the Beekeepers' Convention at Cheltenham that the buzzers employed a kind of deaf and dumb alphabet. A bee that found an abundant source of honey returned to the hive, and by dancing to his brothers and sisters informed the rest of the colony of his discovery. If they failed to follow him, he opened a scent gland on his back and wafted the perfume so that they might follow him.

Affable Passenger: "Your husband's a poor sailor, I believe?" Impassioned Ditty: "Indeed he's not—he's a rich produce merchant."

CARNARVON AT ENTRANCE TO TUTANKHAMUN'S TOMB

The mysterious death of Dr. Arthur E. P. Weigall, noted author and Egyptologist in London, recalls the series of misadventures that overtook many who were connected with the expedition which opened the tomb of King Tutankhamun, at Luxor, Egypt, more than a decade ago. Superstitious Britons say the savant's death is proof that the curse, placed by the ancient Pharaoh on defilers of his tomb, is still working. While excavation work on the tomb was still in progress, Lord Carnarvon, financial backer of the expedition, died mysteriously. Soon after Howard Carter, leader of the expedition, was stricken, but recovered. The Hon. Reginald Wendell, Carnarvon's brother-in-law, died at the age of 39, and Lady Carnarvon was afflicted with a mysterious malady but recovered. Colonel Audrey Herbert, Carnarvon's half-brother, died, and many others whose connection with the nobleman was remote, also suffered through the strange spell.

HOWARD CARTER LORD CARNARVON

WORLD HAPPENINGS BRIEFLY TOLD

The Turkish cabinet has definitely approved the new five-year plan to industrialize formerly agricultural Turkey.

The discovery of two new, small planets between Mars and Jupiter was announced by the Algiers Observatory.

Dr. Lachlan Gilchrist, professor of physics at the University of Toronto, was elected president of the Royal Astronomical Society of Canada at the society's annual meeting.

Two carloads of elk have been shipped from Wainwright, Alberta, to Burwash, Ont. This follows a similar shipment nine months ago to the Ontario Department of Game and Fisheries.

Efforts will be made by the agricultural committee of the Ontario legislature to bring about an inquiry by the Dominion and provincial governments into the operation of stockyards in Canada.

A new world's land plane speed record for a 1,000-kilometer (approximately 622 miles) course was set by the French pilot, M. Massotte, who flew it in two hours, 47 minutes, 31 seconds.

Canada was officially invited to participate in the next Olympic games at Berlin. The invitation was received by James G. Merrick, of Toronto, member of the International Olympic Committee, for presentation to the Canadian Olympic Committee.

The University of Montreal which has been in financial difficulties for several years, is the recipient of a gift of \$100,000 from P. V. Rougier, Parisian manufacturer. The sum is to be devoted chiefly to the medical laboratories of the university.

The winter of 1933-34 is considered by aviation companies to be the worst they have had since planes started operating in the northland, according to Pilot Walter Gilbert, Canadian Airways. Through many causes, planes had to stay idle when there was plenty of work for them to do.

The Wheat Pact

France Reported To Be Doing Her Part To Live Up To Agreement

France is doing her part to live up to the credit and letter of the wheat agreement, according to information reaching Hon. M. A. MacPherson, who represented the prairie provinces at the world wheat conference in London, last summer.

Samples of the literature broadcast over France have reached Mr. MacPherson. They include extremely large posters which urge the greater use of wheat and the limiting of the areas sown to wheat and particularly stress the importance of feeding wheat to livestock and poultry. Farmers are advised to mix one quarter wheat with each feed for a horse.

Prince Of Wales Sells Land

Proceeds To Go Toward Fund For Slum Clearance

Sale of 14 acres in Kensington, southwest London, belonging to the Prince of Wales' Duchy of Cornwall estates was announced in London, the proceeds to be devoted to slum clearance. The area borders the famous Oval, classic cricket-ground, which however is unaffected.

The "Duchy" has a policy of never selling and the gesture came from the Prince of Wales himself without which the Kensington clearance plans would have been materially hindered.

Important Medical Discovery

Miss Pearl L. Moorman, 34, a native of the Ontario country, was acclaimed by the medical world for her major part in developing pellagra therapy, a method of quickly reviving a person from an unconscious state caused by an overdose of an anaesthetic, drowning, suffocation or acute alcoholism.

Magistrate "So you and your wife have been fighting again. Prisoner: No, sir, she kicked me this time."

W. N. U. 2029

Highway On Pacific Coast

Starting At Fairbanks Would End At Buenos Aires

Largest single highway project ever undertaken, the 13,000-mile International-Pacific Highway, is projected to begin at Fairbanks, Alaska, follow down the Pacific Coast to Valparaiso, and terminate at Buenos Aires.

Some sections already are completed. Others are possible. In Central America, most of the route has been surveyed.

From Mexico southward the route would be the same as the long-discussed Inter-American Highway. President Roosevelt has offered to finance the survey from Panama to Santiago, Chile, if the governments concerned agree, at a cost of probably \$500,000.

The tremendous undertaking of a Pacific road was conceived four years ago in Southern California. Since then, such men as Harry Chandler, powerful western publisher, and Fyke Johnson of the National Automobile Chamber of Commerce have become identified with the plan. The Automobile club of Southern California has successfully scouted the route as far south as El Salvador, having sent two motor caravans from Los Angeles.

Sponsors of the road do not urge an overnight plunge of primary highway construction from here to Cape Horn. But they have obtained pledges that the participating nations will lay out their road-building programs hereafter with a view to completing segments of the route as soon as possible.

Approximately 25 per cent. of the International Pacific Highway is an accomplished fact. The route from Hazelton, British Columbia, down the coast to San Diego and thence eastward to Nogales on the Mexican border, is a continuous stretch of 3,000 miles of primary highway.

Recipes For This Week

(By Betty Barclay)

TURNIP CROQUETTES

1 large yellow turnip.
2 potatoes.
2 egg yolks.
1 teaspoon sugar.
Salt and pepper.
Crumbs and egg.
Wash, peel and quarter the turnip. Cook until tender in boiling salted water to which has been added one teaspoon sugar. Press through a sieve. Peel and cook the potatoes separately. Mash until smooth. Combine three quarters of a cup of the cooked turnip with one-half cup of the mashed potato. Add two slightly beaten egg yolks. Cool. Form into small croquettes. Dip in crumbs again. Fry in deep fat. Drain on brown paper.

YEAR-ROUND SALAD

1 package lemon or lime-flavored gelatin.
1 pint boiling water.
2 tablespoons vinegar.
½ teaspoon salt.
1 cup celery, finely cut.
1 pimiento, finely cut.
1 tablespoon green pepper, finely chopped.
½ cup cabbage, finely shredded.
Dissolve gelatin in boiling water. Add vinegar and salt. Chill. When slightly thickened, fold in remaining ingredients. Turn into individual molds. Chill until firm. Unmold. Garnish with mayonnaise. Serves 6.

Employing Hand Labor

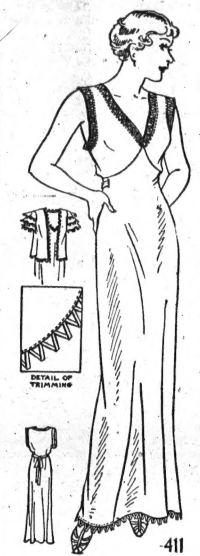

Employers, In Argentina Try To Give Work To Idle

Following the lead of a cigarette manufacturer who has just removed from his factory all cigarette-making machines in order to give work to several hundred unemployed men and women, working-men's leaders in Buenos Aires, Argentina, are trying to enlarge the idea. They are starting campaigns to induce plant owners in many other industries to substitute human for machine labor and thus give employment to thousands still idle.

The man doesn't live who feels at ease in a room where two women are whispering.

By Ruth Rogers

NIGHT GOWN AND BED JACKET ENSEMBLE—A NEW AND DIFFERENT FASHION PARIS SENT US

It's loveliness itself. The nightgown will wrap you in sheath-like slimmers. The sash slips through slashed opening at either shoulder, the front, holding the gown closely to the figure. It ties in sash effect at the back. It has the becoming "V" neckline and deep armholes. The simple straight little jacket favours tripped flounced sleeves. The original was pale blue crepe satin. A craft touch in strips of self-fabric stamped its French origin. It's easy to do. The pattern envelope explains everything about this interesting craft trim in detail. Choose now! Make this exquisitely beautiful ensemble for just the cost of the fabric.

Style No. 411 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 36 requires 4½ yards 39-inch and 10½ yards trimmings. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg

Pattern No. Size

Name

Town

Store Has "Gratis Day"

Customers In Medan, Dutch East Indies, Reap Benefit

Customers of two department stores in Medan, Dutch East Indies, may get a cash refund for goods purchased on a certain day, which is chosen by lot. Under the new plan all purchases made during the month are recorded on a cash slip, a copy of which is given to the customer. On the first day of the following month clips representing each day are deposited in a container, from which one is drawn representing the "gratis day," and those who made purchases on that day are given their money back.

Even Rhinos Are Cheaper

Like potatoes and tomatoes, rhinoceroses are cheaper. Frank Buck, who brings 'em back alive, has offered to sell the St. Louis zoo a young "rhino" for \$9,000. About 10 years ago the price was \$20,000 for similar animals.

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

NO. 5—MYOPIA, OR "SHORT-SIGHTEDNESS"

As explained in Article No. 4, to obtain normal vision, the depth of the eyeball and the curvature of the Lens and Cornea should be in exact relation to each other.

Should the depth be too great or the Lens or Cornea too convex then the focal point of the image will be in the Vitreous Humor in front of the retina and the image will be blurred. This is the Myopic condition, and unlike Hyperopia, nature does not provide any means of overcoming it.

The average Myope (Myopic person) has no trouble at the reading distance, his trouble being poor distant vision. It is significant that Myopic persons seldom indulge in outdoor sports or recreation but turn to books and study. The Germans as a nation are typical of this, especially among the "intellectuals" which may possibly account for their advancement in science. It is estimated that of all the refractive errors of the eye only six or seven per cent of people are Myopic.

Myopia may be congenital or acquired. It may be acquired by excessive close work especially during childhood, before the eyeball has reached its maturity. True Myopia will never improve and all that can be hoped for is that by wearing

proper glasses early enough it will check increase in the depth of the "progressive" type with its resultant evils. It should always be corrected as soon as discovered, for if no other means to prevent further increase of the trouble. Excessive close work, especially if done under improper lighting conditions, is the principal cause of producing and increasing Myopia. Such people are usually intolerant of strong light. Being a "weak eye" such symptoms as easily tired and watery eyes often accompany this condition. Frowning or knitting the brows to obtain better vision is very characteristic of Myopia.

As I said in explaining Hyperopia that it is the commonest cause of a child's eye turning in (crossed) so Myopia is the usual cause of the eye turning out. The great danger of allowing even a small amount of Myopia to go uncorrected is the almost certain probability that it will grow worse and become a progressive condition and from that it is only a step to the "malignant" type when the rule of the Ocular system is usually a matter of time. If a normal depth eyeball of one inch were elongated, as in Myopia, one-tenth of an inch more, the vision would decrease from one hundred per cent to about fifteen per cent. (To Be Continued)

SUNDAY SCHOOL LESSON

JANUARY 21

JESUS BEGINS HIS MINISTRY

Golden Text: "Repent ye, for the Kingdom of Heaven is at hand." Matthew 4:17.

Lesson: Matthew 4:12-25.

Devotional Reading: Isaiah 61:1-6.

Explanations and Comments

Capernaum Becomes The Headquarters of Jesus, verses 12-15.—Now when Jesus heard that John was delivered up, He withdrew unto Galilee. The Fourth Gospel narrates the early activities of Jesus in Judea, Chapters 1 to 3. From Judea He went first to Nazareth, but left that city (Luke 4:16-20) gives the reason for Capernaum which lay on the shores of Galilee in the midst of a densely populated region. Matthew wrote his Gospel especially for the Jews, and he reminds them that Capernaum was in the borders of Zebulun and Naphtali, the tribes who settled there in Old Testament times, and tells them that this was foreshadowed by the saying of Isaiah the prophet, verses 15 and 16. The people that sat in darkness in Galilee did, in truth, see a great light, for the light of Jesus, and the life was the light of men.

"When the gospel was first preached to the Saxons of Northumbria, by Paulinus (as related in Bede's History), King Edwin sat in Council with his chiefs and wise men to consult whether they should give up their idols and believe in the Lord Jesus Christ One of the Councilors arose and spoke thus: "In winter, O King, when thou art sitting in thy hall at supper, with a great fire burning, and thy nobles and commanders around thee, sometimes a little bird flies through the hall, in at one window and out at another. The moment of his passage is sweet to him, for he feels neither cold nor tempest; but it is short, and from the dark winter he vanishes into the dark winter again. Such, O King, seems to me the short life of man; for we know not whence we came nor whither we go. If, therefore, this new doctrine can teach us anything certain, let us embrace it!" And so Edwin and his people came out of the dark winter of heathenism into the glorious light of the gospel, and became Christians, and destroyed their idols; just as in our own day had been done in Madagascar, and in many of the South Sea Islands. So our Saviour's own preaching is described: "The people who sat in darkness saw a great light; and to them that sat in the region and shadow of death, to them did light spring up."—E. R. Conder.

Woman Suffragette Dies

Leaves Valuable Estate To Beneficiaries Of Her Own Sex

The late Elizabeth Knight, one of the pioneers of the women's suffrage movement in Britain, and one of the first women doctors in England, left an estate of \$125,000, which was disclosed when the will was probated, and not a single man was among the beneficiaries.

Dr. Knight served prison terms twice for her suffrage activities, first in 1906 following a call she paid on the prime minister's residence at 10 Downing street, and again in 1914.

Extend Trade Treaty

Second Extension Is Arranged Between Canada And Germany

A second extension as from January has been arranged between Canada and Germany for the trade treaty initially contracted a year ago, according to an announcement made at Ottawa recently. On January 1 last year Germany agreed to exempt Canadian goods from the "Obernicht" or surtax, rates that were applicable to the products of countries which had not then negotiated commercial treaties with the reich. This agreement terminated on March 31, 1933.

From April 1, it was renewed with Canada, according to Germany the benefits of the intermediate tariff, in return for which that country granted to Canada the "conventional" or treaty tariff on such commodities as normally were embraced with the "conventional tariff" schedules. On other commodities Canada was granted the general tariff, with no application to any Canadian goods of the "Obernicht" rates. This agreement held until Dec. 31, 1933.

Watches Over London Parks

Woman Detective Visits Different Place Every Day

A mystery woman is known to the London park keepers as "The Watcher." Day after day she strolls into one or other of the 113 London County Council parks and open spaces to sit and read, or to stroll, or to sit and watch the people who come there, and she is the woman detective employed by the London County Council who watches over the safety of women and children.

The mystery of her identity and the secrecy of her movements help her greatly in her work. This mystery woman has a rota of parks to visit. Every day she is in a different place. If she sees any mischief she reports it to the park keeper; a watch is kept, evidence obtained, and the offender is arrested.

Her rota is only broken when she has to investigate complaints made from any particular park. She also inspects the gymnasia in the parks, the swings, and the children's playgrounds. Many mothers have cause to be thankful for her vigilance.

Had Narrow Escape

Cries for help, uttered as he was being drawn slowly towards the roaring fire in the Toronto Terminal Heating Company furnace, brought rescuers who saved William French, 38, from being burned to death. French, shovelling coal, was sucked into the self-feeding chute which led directly into the roaring furnace.

The only thing civilization hasn't learned is getting in sufficient quantity is alone seats.

One of the worst signs of defeat is the sympathy that goes with it.

ST. LAWRENCE PROJECT IS UP FOR DISCUSSION

Ottawa, Ont.—If the United States congress followed President Roosevelt's suggestion and ratified the St. Lawrence waterways scheme, the treaty would come before the Canadian parliament this session for similar action. The understanding has been that Canadian ratification would be withheld until Washington had dealt with the treaty.

United States would bear most of the expenses of the international section, while Canada would bear the expenditures necessary in the Beauharnois and Lachine sections.

The international section would develop 2,000,000 horse power of electric energy, half going to each country. The Canadian half would be handed over to the province of Ontario which would bear part of the cost of the hydro development.

Toronto, Ont.—Opposition to the proposed St. Lawrence waterway appeared at the Great Lakes division section meeting of the National Association of Marine Engineers of Canada in convention here.

The proposed waterway was opposed "in its entirety" by the Great Lakes division which termed the belief Toronto some day would become an ocean port through construction of the waterway a "political dream."

Lifts Restrictions

United States Government Moves To Enlarge Supply Of Liquor

Washington.—Lifting the restrictions on importations of American type whiskey for 36 days, the United States government moved to enlarge the supply of liquor, lower prices and rout the bootlegger.

What effect the order might have on the Canadian liquor business with the United States was not readily ascertainable. As American type whiskeys have been flowing from Canadian distilleries into the republic outside of any quota restriction, the order was taken to refer to countries other than the Dominion with such right types of liquor.

Next Eclipse Of Sun

Partial Shadow Will Cover Half Of Pacific In February

Northfield, Minn.—An eclipse of the sun "which ends the day before it begins" will cover the Pacific next month and American astronomers officially appeal to atomships to change courses and head into this temporary night in the interest of science.

The partial shadow will cover nearly half the ocean. Just before sunset it will shade the west coast of Canada and the United States.

Find Headquarters Intact

Wellington, New Zealand.—Dr. Lincoln Ellsworth, leader of a proposed trans-Antarctic flight expedition, has arrived at the Bay of Wailes, Antarctica, to find the Richard E. Byrd expedition headquarters established in 1930 intact. The report of his find was received here in a wireless message to the "Bear," supply ship of the present Byrd expedition to the Antarctic.

Prince To Visit South Africa

London, Eng.—Prince George has accepted an invitation to climb Table Mountain at Capetown with General Jan Smuts, he announced at a dinner in his honor. In connection with the forthcoming visit to South Africa, his royal highness said he anticipated an enjoyable instructive tour, with good golf in the invigorating South African air.

Allowed Entry

Washington.—Emma Goldman, deported to Russia in 1919 as an anarchist and who was recently in Toronto, was given permission by the Labor Department to enter the United States for not longer than 90 days.

Employment in Finland is much greater than a year ago.

Chicago Milk Strike

Government Move Terminates Struggle Of Farmers

Chicago.—The Chicago milk strike was ended as the United States government moved toward stern intervention against interference with interstate shipments and with the United States mails.

Settlement of the strike was in the form of a truce signed by representatives of the farmers, the big Chicago dairies, and even the independent dairies, which in the past have refused to guarantee any minimum price to producers.

Under the terms of the truce, a mediation board of three members, one from the distributors, one from the farmers, and a third to be selected by the first two, will be named to agree on a fair price to be paid farmers.

When the embargo ended there was not a drop of milk for sale in Chicago stores, even families with small children could obtain none, and deliveries to hospitals and institutions were threatened.

Safety Of Missionaries

Reassurance Regarding Safety Of Americans In China Is Received

Hong Kong, China.—Some reassurance regarding the safety of six American missionaries trapped in the Fukien province fighting zone was contained in a report that Nationalist forces will not attack Foochow, the provincial capital and centre of an anti-Nationalist revolt.

The missionaries were isolated when the Nanking regulars and rebel forces engaged in fierce fighting near Kutien, about 50 miles from Foochow, and disrupted communications facilities made contact with them impossible during the last 11 days.

After a relentless offensive that reportedly brought them to within 25 miles of Foochow, the Nationalists were said to have abandoned the idea of bombing Foochow, hoping that the 19th route army in the capital would capitulate to avoid great property damage.

Gold Seekers Stranded

Expedition Meets With River Accident In British Guiana

New York.—Associates of William La Varre, head of an expedition exploring the headwaters of the Essequibo River, deep in the jungles of British Guiana, were informed by cablegram of a river accident that cost the explorers their 54-foot canoe and all their supplies.

The accident occurred in the Rupununi River, leaving the expedition isolated from civilization. La Varre indicated the expedition had discovered gold and diamond fields in a region that may prove to be one of the world's greatest sources of such treasure.

New Brunswick Sells Bonds

St. John, N.B.—The province of New Brunswick has sold \$799,000 in 20-year 5 per cent. bonds, at 99.01, to a syndicate composed of the Bank of Montreal, Royal Bank of Canada, A. E. Ames & Co., Ltd., Wood, Gandy & Co., Ltd., Eastern Securities, Ltd., and the Dominion Securities Corp., Ltd., according to an announcement made by Premier L. P. D. Tilly. The issue was made for the purpose of refunding debentures issued in 1924.

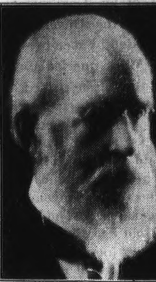

Few Industry Disputes

Regina, Sask.—Only eight industrial disputes occurred in Saskatchewan in 1932, states a report of the Department of Railways, Labor and Industries. They affected 365 employees and 27 employers. Total time lost was 4,191 man-weeks. Trades involved were coal miners, printers, plumbers, and motion picture projectionists.

Feed Grain Shortage

Sarnia, Ont.—Shortage of feed grain has become so acute in Lambton county, Ontario, that farmers fear they will have to draw from their seed grain reserves. Feed grain crops were poor last year and with most of the winter feeding still to come it is certain feed will have to be imported.

CELEBRATES BIRTHDAY

Sir William Mulock, K.C.M.G., Chief Justice of Ontario, who celebrates his 90th birthday on January 19th.

Attains Ambition

Girl Who Worked In Harvest Fields Now Concert Artist

Toronto, Ont.—From dishwashing in a restaurant to a highly paid concert artist is the story of Anka Meyerstrang's success. Anka became a full-fledged Canadian when she was granted naturalization papers and it was then revealed the hardships the young woman fought in western Canada to obtain her ambition.

In the west the young Swedish maid found herself in need of money. She donned men's clothing and worked in the harvest fields. Finally she reached Winnipeg in a box car and started her dishwashing career for a living.

She worked for a while on reaching Toronto in a hat and dress store, but she lost the job. Then on to Montreal to return to dishwashing.

One day at a party her voice attracted a concert manager. Now Anka is singing for a living.

Russian Trade Agreement

Soviets Will Purchase Large Quantities Of French Products

Paris, France.—Soviet Russia agreed to buy \$17,000,000 worth of French products within the next year in a commercial agreement which was prepared for signature.

In exchange France is to grant Russia credit and a minimum tariff on Russian products not competing with the French. In case competition threatens, the French will be free to impose quotas on such products.

France's exports to Russia are increased five-fold by the agreement as she exported less than \$3,300,000 worth of products to Russia in 1933.

THRILLS AT THE CHRISTMAS CIRCUS AT THE OLYMPIA

Every Christmas thousands of Londoners flock to the Olympia to see the famous annual circus, and this year the circus again proved the most popular of the Yuletide entertainments in the British Capital. Our picture, taken during the performance, shows the Medrano Sisters, in their wonderful equestrian act. This is their first appearance in England.

Continue Drive For Highway

Action On Road From The Pas Is Requested

The Pas, Man.—Continuing their drive for action on The Pas Highway connecting with the cities of the plains, civic organizations of The Pas and Cranberry Portage united to put their case before Premier John Bracken, of Manitoba.

The Pas Board of Trade wired Premier Bracken asking if the proposed road had been placed on the provincial program set before the federal government for consideration in anticipated public works schemes to go into effect next spring.

Premier Bracken answered as follows:

"The Dominion Government has not requested us to submit a program of provincial works, nevertheless a program has been prepared of works suggested by various communities which list includes 'The Pas Highway among provincial works'."

The members decided the premier's wire was ambiguous and drafted another asking whether or not The Pas Highway would be on the list sent to Ottawa. At the same time Cranberry Portage representatives sent similar wires.

Bread Control Law

Legislation Governing Selling Of Bread In Alberta To Be Introduced

Edmonton, Alberta.—Legislation to control the production and selling of bread in Alberta is likely to be introduced at the coming session of the legislature. Premier Brownlee and members of his government were asked by a delegation of master bakers for an act governing production, and price control will probably be added by the government on its own initiative.

That this province should have a Bread Act similar to those in Saskatchewan, British Columbia, and Ontario was the request put forward by the delegation.

No Navy Building

Australia Has No Intention Of Embarking On Construction Program

London, Eng.—Australia, like Canada, has no intention of embarking on a program of new naval construction.

Rounding out a review of Empire naval policy, authoritative Australian sources in London, in response to inquiry by the Canadian Press, stated Australia had no intention of new naval building. They pointed out that at present she has only one afloat building, with no orders and no appropriations for any other vessels.

DEBT PROBLEM STANDING IN WAY OF RECOVERY

Ottawa, Ont.—Readjustment of international debt was an essential prelude to world economic stability, Hon. H. H. Stevens, Minister of Trade and Commerce, told the University Club here.

"But," the minister continued, "equally important is that the weight of internal debts be lightened by the lowering of interest rates and by extending the term of payment. In some cases, actual 'forgiving of debt' is necessary."

Canada's chief concern was how to secure for the farmer producer a fair return for his efforts. "We know he cannot pay his debt at present prices."

Mr. Stevens favored the remonetization of silver. "I hold the view that an international exchange based on currency with a metallic backing is the most secure, that is, a currency based on silver and gold. Such has been known and understood by all peoples of the world from time immemorial."

Speaking of lessons from the depression, one thing was clear and that was that problems which one, two, or three years ago were shrouded in mystery were today clearly discernible, if not yet actually solved, the trade minister said. "Where formerly there was only obscurity and fear, we now know what it is we have to face. What had been deemed 'eternal verities' economics have crumbled and fallen."

In the realm of finance, one after another the great nations of the world had abandoned the gold standard, he said.

What was to be done? One economist suggested a managed currency, another a commodity dollar, a third an international exchange based on the quantity of primary products, while others urged remonetization of silver. One man's opinion was as good as another. He held the view for remonetization of silver.

"We have also learned that the paradox of poverty amid plenty is not only possible, but terribly real," said Mr. Stevens.

Fair Pay For Teachers

Alberta Government To Take Action In The Matter

Edmonton, Alberta.—Action is proposed by the provincial government to ensure fair and equitable settlement of disputes between trustee boards and teachers. Premier Brownlee told a delegation from the Alberta section of the Canadian Labor Party.

The Premier stated that the Minister of Education and himself were working on a draft of legislation dealing with the formation of a board of reference and it was hoped that this would be acceptable to all sides.

Wins For Second Time

Edmonton, Alberta.—Championship for the best bird in the provincial poultry show here was awarded to a bronze turkey shown by Mrs. Frank Houcher, Clear, the bird that was best turkey at the recent Royal Winter Fair in Toronto. Reserve champion ship honors on the best bird in the show here went to Jack Brown, of Chilliwack, B.C., on his champion S.C. Rhode Island Red.

Dance Tunes Buried

Montreal, Que.—Eight of the latest dance tunes will not be heard over the air, at least from station CHRM in Montreal, Mr. Justice Frank Curran having granted an interim injunction to the Canadian Performing Rights Society against the Canadian Radio Broadcasting Commission, operators of the station.

Wheat For Russia

Calgary, Alberta.—Ten thousand bushels of Garnet wheat, raised in the Olds district, have been shipped to Russia apparently for seed purposes, according to an announcement by the Alberta wheat pool. This was part of a total shipment of 16,000 bushels, which will be loaded out of New York during the present month.

Stony Plain Sun.

Published Every Thursday at The Sun Office, Stony Plain.

Thursday, Jan. 18, 1934.

Advertising Rates:

Display, 40 cents per column inch; plate, 25c per column inch. Readers in Local, 15c line. Legal and Municipal Notices, etc., 15c line first insertion; 10c line each subsequent insertion.

Supremacy of Reward Wheat

Most of the prizes in the hard red spring wheat have again gone to the famous Canadian-bred variety well named Reward, which was developed by the cereal division at the Ottawa Experimental Farm. This variety originated from a cross between Marquis and an early-ripening variety known as Freide. Since its introduction in the spring of 1928 Reward has won first places in its class at Chicago each year and has also been awarded Grand Championship over all varieties and classes of wheat during the past 4 years, except in 1931.

Reward wheat captured the most coveted prizes at Regina last summer.

It was a fortunate coincidence for Canada that not only is Reward an outstanding exhibition variety but is equally outstanding from a standpoint of milling and baking quality, for which latter reason it is now used very largely by plant breeders desiring to combine high quality with some other characteristic such as high yield or resistance to rust.

MORTGAGE SALE

—OR—

FARM PROPERTY.

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act," under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Post Office in the Town of Stony Plain, in the Province of Alberta, on

SATURDAY, the 27th
DAY OF JANUARY, 1934,

at the hour of 2.30 o'clock in the afternoon, the following property, namely:

The most southerly 15 chains in width throughout of the South East Quarter of Section 24, Township 62, Range 1, west of the Fifth Meridian, containing 80 acres, more or less, and Legal Subdivision 16 of the North East Quarter of Section 13, in said Township and Range, containing 40 acres, more or less. Excepting out of the South East Quarter of said Section Twenty-four all Mines and Minerals.

Terms of sale to be 10 per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of the sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save taxes for the current year.

The vendor is informed that the above property is situated about 14 miles from the Town of Stony Plain, where there is Post Office, Church and Market. The improvements consist of a 2 story log house, log stable, log hog barn and log implement shed. There are about 80 acres under cultivation and 15 to 20 acres of brush. The water supply is a good well.

For further particulars and conditions of sale, apply to STEER, JACKSON, GAUNT & MATHESON, 411 Empire Block, Edmonton, Alberta.

DATED at Edmonton, in the Province of Alberta, this 23rd day of November, A. D. 1933.

STEER, JACKSON, GAUNT & MATHESON,

Vendor's Solicitors.
Approved
"A. T. KINNAIRD"
Deputy Registrar.

Government Takes No Responsibility.

Premier Brownlee, on behalf of his Government, made it clear again, last week, where the Government stands with regard to resolutions passed by members of United Farmers of Alberta Locals. When queried about the Government's attitude towards a resolution passed by Pembina Local of the United Farmers of Alberta to the effect that the Dominion Government should at once resign, Premier Brownlee is quoted as saying that the Alberta Government has nothing to do with any resolutions by the United Farmers of Alberta Locals, nor with what matters shall be considered by the annual convention.

The Premier is quoted further as saying: "The locals are entirely free to pass whatever resolutions they desire, and on any subject, and the convention is likewise free to pass on any matter it wishes. In that respect it is on the same footing as the Labor Convention. The Government does not interfere with either body and takes no responsibility for the decisions of either. Such of their resolutions as later come before us for consideration, treating of provincial matters, are dealt with on their merits."

News Briefs.

Over 300 conventions, many of these international, are slated to be held in Toronto during 1934, according to R. H. Powell, manager of the convention and tourist bureau of that city; a majority of these will be held at the Royal York Hotel.

Heaviest Christmas and New Year traffic in many years was reported out of and into Windsor and Place Viger stations, C. P. R. stations, Montreal, during holiday season. It is regarded as a significant indication of the trend toward prosperity.

Nearly 50,000 miles of travel thru India is one of the features of the Empress of Britain's world cruise started from New York Jan. 4th, to be back at N.Y. May 14. It will take 11 days and will carry passengers across India, west to east, Bombay to Calcutta, and from the N. W. boundary to Madras and Ceylon.

Banff Winter Sports Carnival runs from Jan. 31 to Feb. 4th. A Queen will be chosen; every variety of winter sport will be offered. It is proposed to follow the carnival with a series of sports week-ends, each devoted to a special kind of winter sport.

"There has been a distinct improvement in the movement of general improvement in the movement of general commodities, although grain is down, but on the whole there are most encouraging signs everywhere," said C. E. Stockfield, Winnipeg, assistant to the Vice-Pres. C. P. R. Western Lines, interviewed at Victoria recently.

Starting Jan. 2, C. P. R. locomotive and passenger car shops increased monthly employment to 14 days instead of 10 days in effect for some time past. Increased employment thus affects 6000 men at Angus shops, Montreal; and at Toronto, North Bay, Winnipeg, Calgary, Vancouver.

Cornflakes Says:

Well, anyway, things are improving—I can notice that people is takin' the bills out of the envelopes.

Maybe this country would have better government if the people would keep up with officials as well as they do with the characters in the comic strips.

New Mail Schedule.

From the East and to West—Sun., Tues. and Thurs. at 10:37 p.m.

From the West and to East—Sun. Wed. and Fri. at 8:01 p.m.

Mail for dispatch to East should be posted before 7 p.m. and for West before 10 p.m.
Reg. dispatched and received with every mail.

Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them.

(No Go On With The Story)

CHAPTER XXVI

Avis' surprise and consternation over her discovery of Peter and Camilla on the beach in the early morning, were no less than Camilla's. The first light of dawn cast grotesque shadows on the four faces that stared at each other while their conglomerate thoughts made hasty adjustments and conclusions.

The pallor of fatigue and faded make-up gave to Avis the haggard appearance of a much older woman; while even in the dim light, Camilla's vivid beauty glowed like the promise of sunrise in the sky. She met Avis' accusing, triumphant, angry gaze with a half smile, as if the situation amused her.

All four of them appeared ridiculous enough, for there is no light more merciless to face than that of the early dawn and there is nothing that so leaves its stamp upon the features as the night passed as day. Avis' condemning hauteur increased. "So, this is where our hosts bled with scathing emphasis.

Camilla dismissed all effort at self-defense. "It beats spending the night where you were. Did you just get back? Peter and I were waiting for you, but we didn't think you would stay in town all night. We must have dropped to sleep." She had scrambled

No Cold Is a Fixture with
Buckley's Mixture

No, sir. No matter how hard and deep-seated your cough or cold may be, BUCKLEY'S MIXTURE will conquer it in less than 24 hours. The very first dose gets down to business— you can feel it doing you good.

In lightning-like fashion it attacks everything when they take it for the first time.

If you, or any member of your family, has a cough, cold, flu or bronchitis, try Buckley's and be convinced. Refuse substitutes. Buckley's is sold everywhere.

Improves cooking

Antacid nature of CANAPAR makes it a valuable addition to any kitchen. It is used with all kinds of food and gives them a rich, golden color and a delicious taste.

to her feet and was shaking the sand from her chiffon evening dress.

"I should think you did. Waiting for us!" Avis sneered, and turned to Terry with a scornful imitation of laughter.

Terry shifted his weight from one foot to another, avoided Camilla's eyes and looked at Peter.

Peter's jaw was set hard, but the expression which lighted his eyes denoted his nervous concern. Fate had forced the issue, he was thinking. Perhaps it was best, after all. He looked at Camilla and smiled a little. They certainly did not act like guilty culprits, Avis was thinking.

"I wouldn't say anything more, now," he advised quietly.

"Then, we had better all go up to the house," she suggested, seeming not at all perturbed.

Avis looked at her queerly. She was willing to go the limit, fostered by modern social conventions, but Camilla's nonchalance in the face of such evidence as this, astonished her.

The four turned and ploughed through the sand in silence, single-file in a desolate little procession. The waves lapped the shore softly, as if in gentle sympathy.

The rich mountain slopes that climbed up the side of the cliff house, Avis leading. The boys stopped below to light cigarettes.

"Well?" Terry inquired under his breath, holding his lighter for Peter.

"Sorry we went to look for you, but she insisted. What are you going to do about it?"

Peter inhaled and exhaled the smoke slowly. "Whatever Camilla decides," he said, and started up the steps.

"Can't we fix it up?" suggested Terry. "After all, in spite of the single standard of morals, men defend each other in such difficult crises, and women are eager to betray one another. Women proclaim her equal freedom and independence from man, but still cling to the ancient characteristics of primal jealousy and feminine revenge that were fostered by her dependence upon man.

Peter muttered his appreciation. "Decent of you to suggest it, but I think Camilla will manage all right."

Some of the guests had retired to their rooms, but enough were about to witness the triumphal entry of Avis and her captives. She said nothing, but her elaborate air of scorn and accusation conveyed exactly what her words might have.

"So you found them?" Cathie had exclaimed when they first appeared. "We really were anxious about you, Camilla." No one knew where you had gone from the club. Then, as Avis' congealed manner indicated the situation, she looked at Camilla queerly and added, "Well, now that we're all here, let's turn in. I'm dead!"

Avis turned confidently to Terry. "Will you drive me home, please? I've had enough of this."

"Before you go," Camilla's soft voice sounded strangely resonant in the thin stillness of the early morning, and every eye turned to look at her closely. She hesitated for a dramatic moment, "—allow me to present my husband. Peter and I have been married for more than a month and we expected to keep it a secret for awhile longer—" she stopped, with a little helpless gesture, which explained everything. The silence grew more tense.

"Married!" Cathie was the first to exclaim, finally. "Why, you say old pirates, you!" She threw her arms around Camilla and kissed her.

"First to kiss the bride!" Say, let's rouse the crowd out and celebrate the good news."

"Please, don't," Camilla begged.

"Let's get some rest and celebrate later. Remember, even mother and dad know nothing about it, yet. Won't you let me explain everything to her, first?"

Her suggestion was agreed upon, as if each of them enjoyed the idea of entering the conspiracy to keep the affair a secret for a few more hours. Only Avis did not relinquish her air of shocked disapproval, and insisted upon leaving for home with Terry.

"I AS you wish," Camilla said, with no effort to detain her.

—So it happened that it was Avis who made public announcement of Camilla's marriage to Peter. At a discreet hour of the morning, Mrs.

How To
KEEP FIT

When your physical regularity is disturbed, and you feel run-down and "beat-up," the best thing to do is to take Andrew Liver Salt on several successive days until the normal rhythm is fully established. Andrew Liver Salt, Nature's aid, also needs to do this for you by stimulating the liver cleansing function. Thus, when normal liver action is restored, Andrew Liver Salt keeps you in good health.

Eat moderately. Get lots of sleep. Fresh air and exercise. And take a bracing, energy tonic of Andrew Liver Salt once or twice a week. You will feel better and your health will be restored.

Get Andrew from your druggist. In bulk at 25c and 50c—New York, large bottles, 75c. Write to Dr. Pierce, Buffalo, N. Y. for free medical advice.

Verth telephoned her social antagonist with a sheathed leer of malevolent delight.

"I had never supposed," she told Mrs. Hoyt with distinct emphasis, "that when I permitted my daughter to attend your house party, I was exposing her to questionable influences."

"Why—" Mrs. Hoyt was aghast with horror and anger, "what do you mean?"

"Oh, you know about my daughter finding Camilla with that young nobody who has been seen with her. Of course, Camilla says they are married, but—"

That was the charge which disturbed Mrs. Hoyt from her lethargy of wonder and led to action. She terminated the conversation with Mrs. Verth as adroitly as the subject permitted, and hastened to Camilla's room.

Camilla had not slept since retiring, but she was resting until the household stirred. She was too excited for sleep, anyway, and rather happy that events had reached this climax, when her position as Peter's wife would be determined before the world.

Mrs. Hoyt's knock on her door did not surprise her, but the expression of horror and anger on her face did.

She knew that Mrs. Hoyt had heard the news, already. Even when Camilla had been only a little girl and Mrs. Hoyt's bulk had towered above her in condemnation, she had not seemed so tall and so furious as she was now.

She closed the door and stood over Camilla where she had risen to a sitting posture on the bed. Her small, hard eyes blazed with anger and her words hissed from behind closed teeth.

"So! This is the way you show your appreciation for everything I've done for you?"

Camilla met her gaze bravely, but with due respect. "You mean about my marrying Peter," she said quietly. "I was just waiting to tell you as soon as I heard you awake."

"Then it is true—"

"Yes. Who told you?"

"Mrs. Verth—of all people. She began with some accusing remark about Avis finding you—"

"Yes, I'm sorry about that. But rather glad in a way, because it's a relief to tell you—"

"A relief!" the voice lashed her as if the older woman wielded a whip. "Do you think it is a relief to me to learn not only that you have deceived me all summer with this—this unspeakable affair, but that you have made a mess of it with a nobody, that you have dragged the proud name I gave you down to disgrace? Oh, I might have known you would—a common species never can be made into a thoroughbred!"

Camilla was tempted to smile a little at the implication. "Then it would not seem that I have made a mess of it, after all. Perhaps I have even done Peter an injustice by marrying him. He is so splendid!"

Mrs. Hoyt let the scorn in her eyes blaze upon the girl for a silent moment. "Splendid enough to marry you and let you keep silent about it, so he wouldn't have to take care of you. And I suppose he thought you were the heir to the Hoyt fortune, too! You will see how splendid he is, now!"

Camilla made a little weary gesture and sighed. "You're just wasting your breath with all those accusa-

tions. He knows all about me, and has begged me for a long time to let him take care of me. I wouldn't because it isn't fair. He has enough to do, now, and I only married him with the promise to each other that we should live apart and each be absolutely independent until he makes good. He will, too, but he has to have time."

"That is what he has persuaded you to think."

"Have it as you will. It makes little difference to me," Camilla replied listlessly. "I love Peter and Peter loves me. We are married and nothing can separate us. That is all that matters. I'll leave here today, if you wish. As for your name, I shan't need that any more. I am Camilla Anson, now."

French Plane Spans Ocean

Completes Crossing From Africa To South American Port

The great French flying boat, "Southern Cross," reached Natal Jan. 4, completing an Atlantic crossing from Saint Louis, Senegal.

The plane landed at 7:10 o'clock for a flying time of 18 hours, 17 minutes for the 1,970 miles. The distance from Saint Louis to Natal is 1,970 miles.

The four-motored hydroplane is the French entry in a race with Germany to set up the first trans-Atlantic air mail line between Europe and South America via Africa.

It is capable of carrying 11 tons of fuel.

Within two months, the French government hopes to initiate daily service between Paris and Rio de Janeiro—with a non-stop hop schedule over the south Atlantic.

The giant plane with a wing spread of 144 feet, landed easily on the Pottery River. Its flyers said they averaged 110 miles an hour.

THE RHYMING
OPTIMIST

By Aline Michaels

TO SING ANEW

Song must come welling
From out the heart,
There's no compelling
Glad notes to start.

Lyrics must bubble
Like liquid streams,
No sigh to trouble
Their shining dreams.

No carols cover
A spirit's moan,
Quick ears discover
Pain's undertone.

So you, when bringing
Gladness again,
Set my lips singing
Their old refrain.

Yes, you have taught me
To sing anew,
Dear, since you brought me
Joys deep and true!

May Be Slight Variation

Figures Regarding Speed Of Light Are Fairly Accurate

The speed of light is placed at 299,774 kilometres or 186,271 miles per second, in a new estimate made at Pasadena, Cal., by Dr. Walter S. Adams, director of the Carnegie Institution's Mount Wilson Observatory, said in announcing the new figure that it was not absolute, but that the final computation which will be completed in about six months, would not vary much more than two kilometres from this. The new value is 15 miles per second slower than that reached by the late Dr. Albert A. Michelson in 1927 after he had flashed light beams with mirrors from Mount Wilson to another nearby peak.

Western Canada Directors

Results of the mail ballot for directors of the Canadian Aberdeen Angus association were announced by F. W. Crawford, Winnipeg, secretary. Western Canada directors are: Manitoba, Harry Leard, Portage la Prairie; James, Turner, Carroll, St. Mary's; J. V. Varnon, Estevan; W. D. Lyon, Calgary; Alberta, E. Ward Jones, Devon; B. Henderson, Lacombe; Roy Bait, Horn; Saskatchewan, J. W. Westlake.

Girl to Woman

Mrs. G. F. Rees of 40 Cambridge St., Oakton, N.Y., writes: "I was a girl developing and was quite anxious, nervous, and weak. I used Dr. Williams' Pink Pills and I feel like a new woman. I am now a girl to woman."

RELIEVES COLDS WITHOUT "DOSING"

Little Helps For This Week

"The Lord is good, a strong-hold is the day of trouble; and He knoweth them that trust in Him."—Nahum 1:7.

Leave God to order all thy ways, And in His ways will He direct thee: Though thou shalt find Him in the evil days. Thy all sufficient strength and guide Who trusts in God's unchanging love Builds on the rock that cannot move.

Our whole trouble in our lot in this world rises from the disagreement of our mind therewith. Let the mind be brought to the lot and the whole tumult is instantly hushed; let it be kept in that disposition and the mass shall stand at ease in his affliction, like a rock unmoved when the waters beat upon it.—T. Boston.

How does our work become sanctified? By conforming itself unreservedly to that of God. We will all that He wills, and will nothing that He does not will; we attach our feeble will to that all-powerful will that performs everything. Thus nothing can ever come to pass against our will, for nothing can happen save what God wills, and we find in His good pleasure an inexhaustible source of peace and consolation.—Fenelon.

It's LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Colored necessary

You see to feel healthy and happy, you must get your liver good. If you have a bad liver, you will feel sick, nervous, and tired. You will have a headache, and your eyes will be red and sore. You will have a bad taste in your mouth, and your breath will be bad. You will have a bad complexion, and your skin will be dry and itchy. You will have a bad sleep, and you will be restless and nervous. You will have a bad appetite, and you will not be able to eat. You will have a bad temper, and you will be irritable and quarrelsome. You will have a bad memory, and you will be forgetful and confused. You will have a bad heart, and you will be nervous and anxious. You will have a bad stomach, and you will be bloated and gassy. You will have a bad bowels, and you will be constipated and uncomfortable. You will have a bad kidneys, and you will be weak and tired. You will have a bad bladder, and you will be nervous and anxious. You will have a bad lungs, and you will be coughing and wheezing. You will have a bad throat, and you will be sore and red. You will have a bad nose, and you will be running and itchy. You will have a bad ears, and you will be ringing and noisy. You will have a bad teeth, and you will be sore and aching. You will have a bad mouth, and you will be bad smelling and tasteless. You will have a bad skin, and you will be dry and itchy. You will have a bad hair, and you will be falling out and thinning. You will have a bad eyes, and you will be red and sore. You will have a bad ears, and you will be ringing and noisy. You will have a bad nose, and you will be running and itchy. You will have a bad throat, and you will be sore and red. You will have a bad mouth, and you will be bad smelling and tasteless. You will have a bad skin, and you will be dry and itchy. You will have a bad hair, and you will be falling out and thinning. You will have a bad eyes, and you will be red and sore. You will have a bad ears, and you will be ringing and noisy. Brightbank News

Mrs Bertha Horn of Clover Bar is visiting with her cousin Bertha Zahn.

The Bright Bank U. F. A. Local held their annual meeting on Monday, January 8th, when some new members were signed up.

With music by "Snappy Four" the dance put on by the U. F. A. on the 5th was a great success.

Miss Shiela Young intends going on a trip to Oklahoma in the near future, to visit relatives.

Mr A Krause is leaving this district soon. He has pre-empted a half section in Low Water Lake district, and expects to start up a horse ranch there. He has bought

Old Bossy Pays Dividends.

And another sign of improvement in the farmers' prospects is that the price of cream is now up around 20c. per pound; the highest since 1928. Those farmers who stayed with Old Bossy are now likely to get the first return to better prices. Eggs, hogs and cattle all seem likely to come back before wheat.

several good brood mares in this district, including that well-known chestnut Punch maro off Mr H Summerfield.

Messrs D Dickie, A Krause and H Summerfield shipped a car of hogs to Edmonton last week.

Don't forget the whist drive and dance at the Brightbank Schoolhouse, Friday Jan. 19

Stony Plain and District

Baker Trapp made a trip to Onoway on Tuesday with a bread order amounting to 300 loaves.

Since the posters were printed for the Rifle Club's game on the 23d, the prices of admission have been reduced to 35c. & 15c.

The Echo says Mr John P Crowe arrived safely back in Athabasca, after his lengthy holiday.

The card party at Kelly's Hall, on Jan. 16, in aid of St Philip's Church, resulted in the following winning prizes: Ladies, Mrs C Young 1st, Mrs L M Larson 2d, Mrs L M Larson 1st, "T Dairmont 2nd.

The pupils at St Matthew's school had a Wednesday half-holiday this week.

Several of the town's business houses are taking stock this week.

The new auto license plates, red figures on white, are beginning to be noticed on a few of the local autos and trucks.

BUTTER AND EGGS WANTED at The Royal Cafe.

The Farmers' Phone Co.

Good progress is being made in the work of organising the Farmers' telephone system for the Inga, Holborn, Rosenthal districts, with Mr W T Propp as one of the organisers. Mr Geo Liebert, of Inga, is the secretary-treas. Arrangements are under way for the new system to have a connection with our present Central in Stony Plain, whereby the Government is to be paid a certain rate for the privilege. A goodly number of farmers are said to have signed up, on what are considered a very low rate for operation, after the patrons have paid the initial payment of \$15 for their phones.

STONY PLAIN.

Tobogganing with a Jitney.

While on their way along Edmonton's Jasper ave. east, on Saturday afternoon, heading for the Lutheran college's ice rink, to attend a game of hockey, a carload of Stony young men had the misfortune to have the right front wheel of their car become disengaged while they were trying to cross 92nd St., and the vehicle left the road. As one of the passengers described it: "After we left the Curve so suddenly and started going down hill, it looked for sure we'd land in the foot-of-the-hill greenhouse, among chrysanthemums, krautillies—and glass—but the amazing dexterity of our driver averted this, as, the first thing we knew, a nice little bungalow bobbed out in front of us, and we hit it, and stopped. Eddie said 'twas the first time he was ever so glad to strike such a good stopping place."

Hockey Notes.

Stony Seniors lost the opening game of the season to the Concordia College by a score of 6-5 on Saturday. Playing their first game abroad and only 8 players in uniform, our team was disorganised in the 1st period, and before half of the period was history the score was 4-0. The 2d period was different; the C. C. boys only being able to crash in a fluk goal; score 5-2. The last frame saw some fast hockey; Stony opened up and tied the score at 5-5; a penalty gave Concordia another break, the game ending 6-5.

Stony scorers: O Miller 1; Ph Enders 1, 1 assist; Henry Trapp 3 and 2 assists.

Next Sunday Stono plays hosts to the Collegians; and with a full team, on home ice, Stony should take ample revenge.

Watch for the Auction Date!

After returning from their trip to the Coast, where they made a purchase of farm property, the Messrs Ernest and Chris Pitzler will be offering by public sale their entire farm equipment some time in the middle of the month of March. The equipment consists of farm machinery, horses, cattle, household goods, etc. There will be no reserve on any article; everything will be sold, regardless. There will be no private sales of any articles. Watch for the date!

Prize-winning Eggs.

Mrs Carmichael was in town on Saturday, and had with her eggs from her prize winning layers. One carton of these weighed 33 ozs. to the dozen. Another carton contained some extra-long sized new fruit-laid by pullets which specialise on double-yolked eggs. This enterprising poultry raiser had intended sending some of her prize-winning birds to the Poultry Show in Edmonton last week, but was unable to get her entry listed in time.

Reduced Prices!

R. BREITKREUTZ, Blacksmith, Stony Plain.

The Fall of the year is the season when every Farmer should take a look over his Machinery, with a view to having it put in shape for the Spring. Work, before it is stored away for the Winter.

I am giving a fair Discount for all Spring Work done during the Winter months on the following articles:

Seed Drill Shoes Sharpening and Laying,
Disc Sharpening, Plow Sharpe Sharpening and Pointing,
Harrows Sharpening, Wagons Cut Down and Repaired,
And other Repairs of All Kinds.

Oxygen-Acetylene Welding, and
Taking Orders for New Floor Shaves, to be Delivered in Spring, at a Very Low Price.

A number of New Shaves on Hand for different makes of Plows; Oak Wagon Axles and Poles; Neck Yokes and Singletree Woods; Suggy Shafts Complete and Single, at a low price.

I have a number of Steel Sleigh Shoes all ready made up, at a low price, ready to put on; and a number of Sleigh Runners.

Bring in your work to me now, and take advantage of these specially low reduced prices before the time expires in February, and don't wait until the Spring, when the work will be piled up and you will be kept waiting for your job; and at the same time you will have to pay more for having it done.

Come in and tell me what you have to be repaired, and take the Discount, and Save.

R. Breitkreutz, :: Stony Plain.
